## **Brief Industrial Profile of Sundargarh District**

**1. General Characteristics of the District:** The present district of Sundargarh has 6.24% of State area and 4.97 % of state population. The headquarters town of the district i.e. Sundargarh is well connected with all big cities of the country by road. The district has 3 Subdivision, 9 Tahasils, 17 CD Blocks, 4 Municipality and 262 Gram Panchayats with a total of 1764 villages also out of which 1723 are inhabited and 41 are uninhabited. The decennial growth rate of population is 16.34% during the decade. The literacy rate in the district is 64.86 %.

The district has not escaped from the ever-increasing problem of unemployment and poverty. Lack of awareness for commercial ventures due to ignorance is prevailing in the district, though there is enough scope for setting up commercial ventures especially small-scale industries. Paddy is the principal crops of the district. Besides other crops like Biri, Groundnut, Vegetable, fruits and Spices etc. are grown in the district. Agriculture in the district is done through traditional methods. So there is further scope to increase the productivity as well as production from agriculture by adopting modern technology. The climate of the district is also suitable for growing different horticultural crops also. Floriculture can also be introduced and commercialized in the district to cater to the increasing demand in the market.

The district is well connected through road. There is no problem of marketing as the district headquarter and also the commercial town of Rourkela are well connected to all big cities of the country. There are a number of medium and minor irrigation projects, dug wells, tube wells, bore wells etc.

**1.1 Location & Geographical Area:** Sundargarh, one of the border district of Western Orissa, geographically extends over the North Western portion of the state and located between 21<sup>o</sup>. 35 North latitudes and 22 <sup>o</sup>.32 N and 83 <sup>o</sup>. 32 East and 85<sup>o</sup> 22 East longitudes. It is one of the northern most districts of the state of Orissa. It is bounded in the North by the district of Ranchi and Singhbhum of Jharkhand, in the South by Sambalpur, in the west by Raigarh district of Chhatisgarh and in the East by Keonjhar district. The district is having geographical area of 9712 sq.kms

**1.2 Topography:** Geographically the district is not a compact one and it consists of widely dissimilar tracts of expansive and fairly open landscape, dotted with tree clad innovated places, vast inaccessible forest, extensive river, village and mountainous terrains. Broadly speaking, it is an undulating tableland of different elevations broken up by rugged hill ranges and cut up by territorial hill stream and rivers i.e. IB and Brahmani. The general slope of the landscape is from North to South.

The areas covered by the Sundargarh and Panposh Sub-Divisions are long undulation tracts of about 700 ft. (213 mt.) above sea level, dotted with hill ranges and isolated peaks of considerable height. The village Hemgir lies in the middle of a

plateau of nearly 1150 ft (351 mt.) which is on the West of Sundargarh Sub-Division. To the North of Hemgir, the land is considerably hilly, while to the south it is relatively plain with a minimum elevation of nearly 700 ft.(216 mt.) near Chuanbahal village. The Bonaigarh Sub-Division is broadly an isolated hilly tract with an average elevation of about 800 ft (244 mt.) above the sea level. It is shut in all sides by rugged hills intersected by few passes or gorges which connect it with the surrounding areas.

Thus, topographically, this district exhibits widely diversified tracts of mountainous regions inaccessible pockets or forest and extensive river valleys with her mysterious flora and fauna.
