The following items have potentiality for export.

1. High Carbon Ferro Chrome
2. MS Hot Rolled Coil
3. Sponge Iron
4. Stainless Steel
5. Ferro Manganese

3.6 Growth Trend:

There is a positive trend in Ferro Chrome, sponge iron and power plant unit in the district. In general there is a growing trend of number of units registered, employment generated in the district over the years. However the growth trend during the year 2014-15 , 2015-16 and 2016-17 appears to be very high as large number of Industries had gone into production.

3.7 Vendorisation /Ancillarisation of the Industry

At present, there are 15 nos. large and medium scale industry in the district, besides another 13 number of large projects are under pipeline. Thus, there is enough scope for ancillary development. Similarly, some ancillary and downstream industries can be promoted basing upon the requirements of the mother plants located in the neighbouring districts. In this liberalized era, the place or locality is not a rigid criteria for development of ancillary industries. This can be done taking into view the requirement and demand of the mother plants located inside the state. Similarly, as a number of large scale industries are on the pipeline specially on steel, mining and power sector for which MOU has already been signed. So, there is enough scope for ancillarization in near future. Some of the ancillary unit which can be promoted in the district as reported by DIC, Dhenkanal are:

- (1) Lancing Pipe and Tube
- (2) Grease
- (3) Mechanical Job work and spare parts
- (4) Ferrus Alum
- (5) Steel, Official furniture
